National Animal Health Laboratory Network

Last Modified:

The National Animal Health Laboratory Network (NAHLN) is a network of animal disease diagnostic laboratories that provides ongoing disease surveillance, responds quickly to disease events, communicates diagnostic outcomes to decision makers, and has the capability and capacity to meet diagnostic needs during animal disease outbreaks.

About NAHLN

Featured

Laboratories

View information for current NAHLN laboratories by State, designation, or disease testing. Here, you'll also find SOP lists and information on joining the NAHLN.

Learn More

NAHLN-NBAF Partnership

Experts from APHIS, the National Bio and Agro-Defense Facility (NBAF), and NAHLN identified five key NAHLN facilities across the country to each host a scientist to work on this collaborative project.

Learn More

Response Guidance

NAHLN provides investigational and surveillance testing for high consequence

Surveillance and Preparedness

Learn how NAHLN laboratories play a critical role in APHIS' foreign animal disease

More Resources and Information

Antimicrobial Resistance Monitoring Program

View information on the NAHLN Antimicrobial Resistance Monitoring Program.

NAHLN Activities

View further information about NAHLN activities, including our founding principles, quality management standards, and more.

Publications

Browse NAHLN-related publications, including our newsletter, disease response guidance, and other documents.

Funding Opportunities

NAHLN works to safeguard U.S. animal health and protect the livelihoods of U.S. farmers and ranchers. View funding opportunities for NAHLN laboratories.
