Current Nationally Reportable Diseases

Below is the list of all current nationally reportable diseases and published case definitions. The table reflects the latest information. The PDF version of this list (229.66 KB) is updated annually.

For more detailed information on World Organisation for Animal Health (WOAH) disease status, view our most recent WOAH 6-month reports for terrestrial and aquatic animals.

To learn more about the terms used in this table, see our Glossary of Terms.

For more detailed information on reporting, go to the National Animal Health Reporting System (NAHRS) web page:

Search by disease name or keyword

* For diseases listed as "Notifiable/Monitored," please refer to the case definition or the PDF version of this list (229.66 KB) for more details.

Glossary of Terms

Disease present: The disease is present with clinical signs in the whole country (in domestic species [farmed] or wildlife [wild species]).
Infection/infestation: Infection or infestation confirmed by diagnostic testing in the absence of clinical signs (in domestic species [farmed] or wildlife [wild species]).
Infection/infestation limited to one or more zones: Infection or infestation confirmed by diagnostic testing in the absence of clinical signs and is limited to one or more zones or compartments (in domestic species [farmed] or wildlife [wild species]).
Disease absent: The disease was absent in the country during the reporting period (in domestic species [farmed] or wildlife [wild species]).
Disease limited to one or more zones: The disease is present with clinical signs and limited to one or more zones/compartments (in domestic species [farmed] or wildlife [wild species]).
Disease suspected: The presence of the disease was suspected but not confirmed in the whole country (in domestic species [farmed] or wildlife [wild species]).
Disease suspected and limited to one or more zones: The presence of the disease was suspected but not confirmed and limited to one or more zones or compartments (in domestic species [farmed] or wildlife [wild species]).
Disease never reported: The disease has never been reported (historically absent) for the whole country in both domestic species (farmed) or wildlife (wild species).
No information: No information is available regarding the presence or the absence of this disease during the reporting period (in domestic species [farmed] or wildlife [wild species]).

Not Applicable:[**] Only reportable to WOAH in farmed or domestic species

[**] This definition is written by APHIS, but all the rest above are sourced from WOAH 6-month report procedure documentation.
