NAHMS Poultry Studies

Last Modified:

In collaboration with USDA’s National Agricultural Statistics Service (NASS), the NAHMS Poultry 2025 Small Enterprise Study will provide important information about management and biosecurity practices used on U.S. small enterprise poultry operations.

This national study invited selected producers to participate from all 50 States and focused on operations with table egg layers (300 to 74,999 inventory); broilers (300 to 199,999 moved or sold annually); and meat turkeys (300 to 59,999 moved or sold annually).

Data collection concluded in early 2026.

Important documents for those interested in the study can be found below.

NAHMS Backyard Animal Keeping 2024 Poultry Biosecurity Information Sheet
