NWRC Utah Field Station Staff: Lindsey Perry

Last Modified:

Dr. Lindsey Perry is a research biologist for the USDA-National Wildlife Research Center and her research is focused on avian predator ecology and human-wildlife conflict.

Research Project

Predator Research

The Predator Management Project aims to improve current knowledge of predator ecology, behavior, genetics, and demographics relative to predators and depredation on species of human concern; assess predator responses to management strategies; and develop techniques and control methods to effectively assess and manage mammalian predation on livestock and natural resources.

Current Research

Golden eagle conflict on livestock production areas in Wyoming
