

**VETERINARY HEALTH CERTIFICATE
EXPORT OF SWINE TO THE UNITED STATES OF AMERICA**

EXPORTER: _____

ADDRESS: _____

IMPORTER: _____

ADDRESS: _____

FEDERAL AND/OR STATE IMPORT PERMIT NUMBER: _____

NUMBER OF ANIMALS CERTIFIED FOR EXPORT: _____

I, the undersigned official veterinarian duly authorized by the Government of Canada, after due inquiry and to the best of my knowledge, do hereby certify that the following requirements are met:

1. The swine to be exported into the United States, have been inspected on the premises of origin within fourteen days prior to export; and found to be free of evidence of communicable disease. In the event of an outbreak of a foreign animal disease listed under article 3 below, the swine must be inspected on the premises of origin within seven (7) days prior to export.
2. Insofar as it has been possible to determine, the swine for export have not been exposed to communicable disease during the sixty (60) days prior to export.
3. Canada is free of African swine fever (ASF), classical swine fever (CSF), foot-and-mouth disease (FMD), swine vesicular disease (SVD), and swine pseudorabies (Aujeszky's disease, AD).

OR

In the event of an outbreak of foreign animal disease, the swine covered by this health certificate did not originate from or transit through a current United States Department of Agriculture, Animal and Plant Health Inspection Services (USDA APHIS) recognized zone or region established due to the detection of ASF, CSF, FMD, SVD, or AD in captive swine^a. The swine had no contact with any swine or swine products (including imported swine or products) that were located in a current USDA APHIS recognized zone or region established due to the detection of ASF, CSF, FMD, SVD, or AD in captive swine.

OR

In the event of an ASF outbreak in non-captive swine^b, the swine covered by this health certificate did not originate from a current USDA APHIS recognized area of control^c or assurance area^d established due to the detection of ASF in non-captive swine, or transit through an area of control. The swine had no contact with any swine or swine products (including imported swine or products) that were located in a current USDA APHIS recognized area of control or assurance area established due to the detection of ASF in non-captive swine.

Cross out as appropriate.

4. The swine are not vaccinated against ASF, CSF, FMD, SVD, or AD and are not progeny of vaccinated sows.
5. The swine are not vaccinated with any other live or attenuated or inactivated vaccine during the fourteen (14) days preceding export to the United States, other than standard vaccination programs developed for newly weaned or feeder pigs.
6. The swine for export have been identified with a tag/indicator approved under the Canadian National Livestock Identification and Traceability (TRACE) program. If tattoos are used as an identifier, they are clearly legible.
