

Avian Influenza is Here. Know the Signs.

Highly pathogenic avian influenza (HPAI) is a fast-moving, **deadly disease that threatens poultry** across the United States and can kill entire flocks within days.

**Trouble
Breathing**

**Lack of
Appetite**

**Nasal
Discharge**

**Decreased
Egg
Production**

**Sudden or
Unexplained
Death**

Immediate action and strong biosecurity are critical.
See signs of illness? Isolate sick birds. Call 1-866-536-7593,
your veterinarian, or your State animal health official.
