October 2025	35	0	26967
November 2025	35	0	27002
December 2025	30	0	27032
January 2026	36	0	27068
February 2026	30	0	27098

There were 6 surveillance inspections conducted at 6 different sites for a total of 30 fish sampled this month. Samples are targeted to moribund and fresh mortalities. The water temperatures continued to decrease in response to colder air temperatures. Routine harvest continued. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
